RAFAEL ALMEIDA

Objective

Data Scientist specialized in machine learning, statistical analysis, and predictive modeling for business decision-making. Experienced in processing large datasets, developing forecasting models, and analyzing business indicators to identify patterns and generate actionable insight.

Skills & Abilities

- Python
- R
- SQL
- Applied Statistics
- Machine Learning
- Regression and Classification Models
- Time Series Analysis
- Clustering
- Exploratory Data Analysis
- Pandas, NumPy, and Scikit-Learn
- TensorFlow
- PostgreSQL and BigQuery
- Power BI and Tableau
- A/B Testing
- Data Visualization

Experience

DATA SCIENTIST — DATACORP TECHNOLOGY

February 2024 – Present

- Developed predictive models for demand forecasting, achieving **91% prediction accuracy**.
- Built classification models to identify customers with a high probability of churn, contributing to a **15% reduction in customer churn**.
- Designed data processing and preparation pipelines using Python and SQL.
- Conducted statistical tests to evaluate commercial strategies and customer acquisition campaigns.
- Developed analytical dashboards for monitoring business performance indicators using Power BI.

DATA ANALYST — NOVA ERA BANK

January 2022 – January 2024

- Automated data analysis and reporting processes using Python and SQL.
- Reduced approximately **12 hours of manual work per week** through the automation of recurring analytical processes.
- Conducted customer behavior analyses to identify consumption patterns.
- Supported the development of statistical models for forecasting financial indicators.

Education

BACHELOR OF SCIENCE IN COMPUTER SCIENCE — FEDERAL UNIVERSITY OF SÃO PAULO (UNIFESP)

Completed in 2021

GRADUATE CERTIFICATE IN DATA SCIENCE AND ARTIFICIAL INTELLIGENCE — INSTITUTE OF APPLIED TECHNOLOGY

Completed in 2023
