THIAGO ALBURQUER

DATA ENGINEER

Objective

Data Engineer focused on designing modern Big Data architectures, structured ETL/ELT pipelines, data governance, and reducing operational costs in cloud environments.

Experience

Professional Experience

- **Mid-Level Data Engineer** – Global Data Corp (05/2023 – Present)
    - Migrated a legacy Data Warehouse to AWS Redshift, generating an annual savings of **US$ 45,000** in infrastructure costs.
    - Developed event-driven pipelines using Kafka for real-time sensor data ingestion and processing.
- **Junior Data Engineer** – Alfa Digital Bank (08/2021 – 04/2023)
    - Built and monitored over 50 DAGs in Apache Airflow for data ingestion from credit bureau bureaus.

Skills

- **Data Engineering:** Apache Spark, Apache Airflow, Kafka, and dbt.
- **Cloud Computing:** AWS (S3, Redshift, Glue, Athena, IAM).
- **Storage & Architecture:** Data Lakes (Delta Lake), Data Warehouses, and NoSQL (DynamoDB).
- **Automation:** Python, Scala, Shell Scripting, and Terraform.
